

Engine 557 Restoration Company

The Engine 557 Restoration Company gives our sincere thanks to the following businesses who, as of February, 2015, have contributed over \$480,000 of in-kind contributions of goods and services towards returning Engine 557 to operation.

Large or small, each contribution has brought us closer to the goal. The individual contributions are recognized in progress reports at ww.557.alaskarails.org under "Restore." Please thank them for their support!

Mission: The Engine 557 Restoration Company's mission is to restore, operate, conserve, and display former Alaska Railroad steam locomotive number 557 for the education and enjoyment of Alaskan residents and visitors.

Vision: To give Alaskan rail belt residents the opportunity to see, hear, smell, and feel an operating steam locomotive, be exposed to an earlier technology, and to appreciate the difficulties and sacrifices which have contributed to the development of modern Alaska.
